

CIMcloud was built from the ground up for product-centric companies that need real B2B eCommerce. With 20+ years experience delivering ERP-integrated solutions that use industry-proven, out-of-the-box sync technology, CIMcloud lets companies focus on growing their business, not project managing multiple vendors and a custom solution.

Benefits

Native

With 20+ years experience, CIMcloud delivers eCommerce tools designed for product-centric companies that need real eCommerce and not a piecemeal solution.

Integrated

CIMcloud is the premiere platform with an advanced, out-of-the-box integration built for B2B that syncs bi-directionally with Acumatica.

Fast

The CIMcloud platform offers best-in-class site speed, improving users' experience, order conversion rates and customer loyalty.

Open

CIMcloud provides a combination of both no-code and code injection configuration options to provide greater control over site experience.

Features
