

Streamline Workforce Processes with ExakTime and Acumatica

Easily and quickly share data between systems to save time and ensure accuracy.

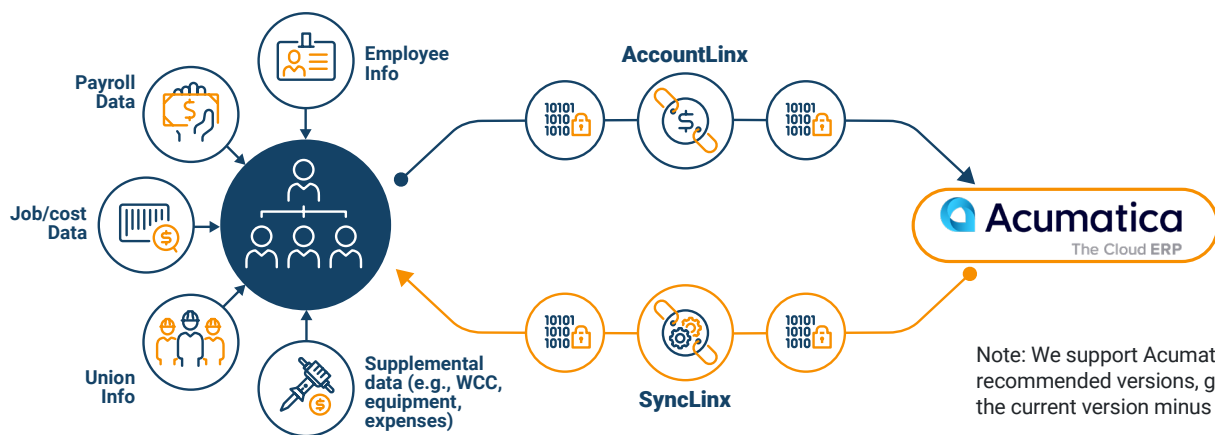

Accurate employee data is important to run your business.

If you can't leverage data across multiple applications you get mistakes, re-entry or rework. That's why it's important that your time tracking solution integrates with other systems in your ecosystem like payroll.

Data integration has advantages

- Single source for the time & attendance data needed for accurate payroll
- Fewer data entry points reduces data errors and saves time
- Enhanced accuracy means better compliance for data-driven requirements like Certified Payroll
- All data is secure and protected
- Minimal set-up required; integration protocols are established, tested and turnkey

ExakTime and Acumatica Integrate Seamlessly

Note: We support Acumatica's recommended versions, generally the current version minus 2.

Want to learn more about how ExakTime's integration with Acumatica can make your pay and job data more accurate and streamline your operations?
