**Work Without Limits:** Offline-first architecture means no lost time—completed tasks sync instantly once reconnected.

**Boost Field Productivity:** From job scheduling to payment capture, Jigx simplifies field operations in one mobile app.

**Drive Adoption:** Fast, user-friendly apps designed to keep contractors, reps, and technicians fully engaged.

**Accelerate Collaboration:** Keep developers, subcontractors, and field teams connected and up to speed.

## Game Changing Mobile Tech

Gone are the days of struggling with a cumbersome Acumatica mobile app & spending 20 minutes on a simple transaction. Jigx integrates effortlessly with other software, eliminating the need for multiple apps.

# Measurable ROI That Impacts Your Bottom Line

## \$130,000/YEAR SAVED IN ADMIN TIME

An HVAC company eliminated 1 hour/day of paperwork for each field tech. With 10 techs, that added up to 2600 hours annually—and \$130,000 in savings.

## FROM 15 TO 3 DAYS: FASTER INVOICING = FASTER PAYMENTS

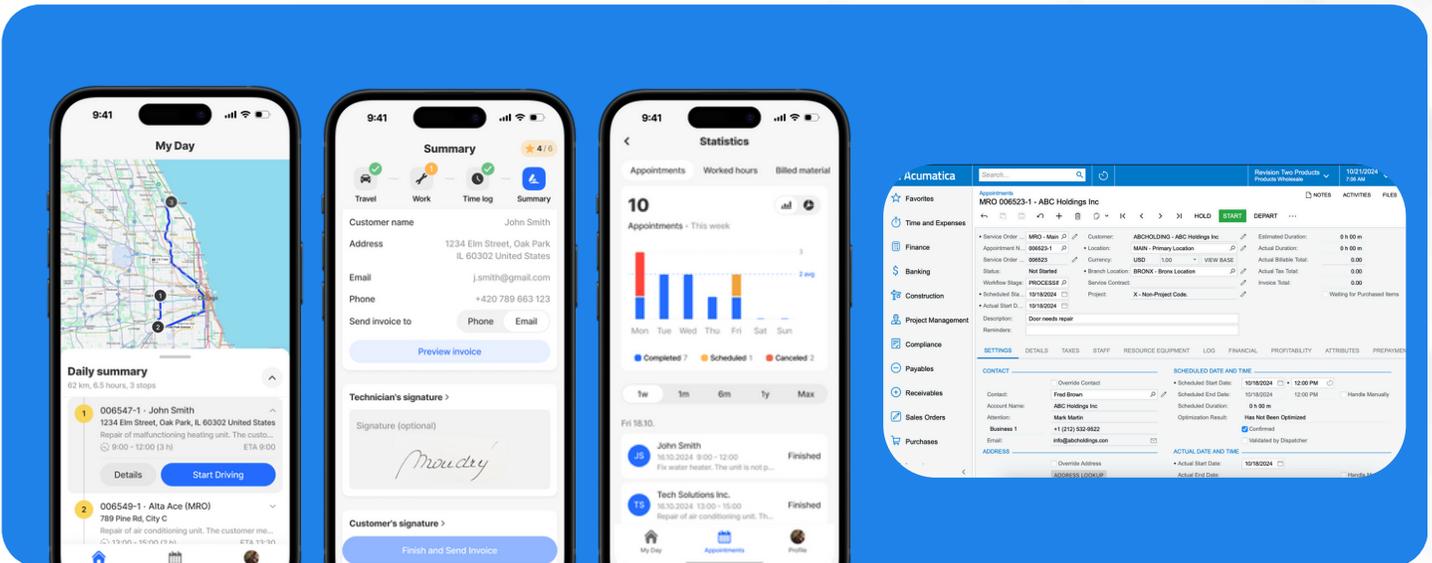

A solar company now generates invoices on-site. Payments are received 5x faster and collections time is down.

## THOUSANDS PROTECTED THROUGH BETTER DOCUMENTATION

A construction firm reduced disputes and warranty denials by capturing job evidence in real-time with Jigx, even offline.

## ALWAYS ON: WORK DOESN'T STOP WITH NO INTERNET

Teams working in remote Canada used to shut down during outages. Now, they keep working and maintain SLA compliance thanks to Jigx's offline-first design.

Jigx is a mobile solution that helps organizations manage and engage their remote workforce. The native and intuitive app experience means data is seamlessly available offline and serves as a single digital interface between businesses and their employees, helping them navigate at scale. With seamless connections to Acumatica, enterprises can intelligently manage, schedule, dispatch, and support remote workers on the go, whether they are in fixed location facilities or mobile field workers on the frontline.
